SUBCELLULAR LOCATION: Integral membrane protein.
TISSUE SPECIFICITY: Kidney.
SIMILARITY: Belongs to the sodium/phosphate cotransporter family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          S69915; S69915.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Database
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Post-processing:
  Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  DB DB

Sequence 121, Application US/10455822

Publication No. US20040048798A1

Publication No. US20040048798A1

GENERAL INFORMATION:

APPLICANT: Agensys, Inc.

APPLICANT: Agensys, Inc.

APPLICANT: Ge, Wangmao

APPLICANT: Chalita-Eid, Pia M.

APPLICANT: Challita-Eid, Pia M.

APPLICANT: Paris, Mary

ITILE OF INVENTION: Nucleic acids and Corresponding Proteins

TITLE OF INVENTION: Entitled 98P4B6 Useful in Treatment and Determing Proteins

TITLE OF INVENTION: UNUMBER: US/10/455,822

CURRENT APPLICATION NUMBER: No. US20040048798A1 Yet Assigned

PRIOR APPLICATION NUMBER: No. US20040048798A1 Yet Assigned

PRIOR APPLICATION NUMBER: US60/370,387

PRIOR APPLICATION NUMBER: US60/370,387

PRIOR FILING DATE: 2002-04-05
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              PRIOR APPLICATION NUMBER: US60/317,840
